

Conflict Minerals Policy Statement

NetBit is committed to be a responsible corporate citizen and seeks to source products, components and materials from companies that share our values around human rights, ethics and environmental responsibility.

NetBit supports industry-wide efforts to identify, reduce and eliminate the use of conflict minerals originating from the DRC and adjoining countries. NetBit is committed to complying with any applicable requirements under the Conflict Minerals Rule and has insisted that our suppliers meet its obligations under the legislation.

Suppliers to NetBit are expected to establish their own conflict minerals policies, due diligence frameworks and management systems that are designed to prevent conflict minerals originating from the DRC or an adjoining country, to the extent that they benefit groups committing human rights violations, from being included in the products sold to NetBit. In the event NetBit determines that a supplier has failed to develop and implement reasonable steps to comply with this Policy, NetBit reserves the right to take appropriate actions, which may include discontinuing the business relationship with that supplier.
