

## Plastic Free Mission Statement

NetBit is committed to be a responsible corporate citizen and seeks to source products, components and materials from companies that share our values around human rights, ethics and environmental responsibility.

In recent years, we have become incredibly aware of the impact our waste has on the environment both locally and globally, and we are prepared to take steps to improve that. Single use plastics are a part of what we buy and consume as a business, and of course as a nation. Our mission is to eradicate single-use plastics in NetBit processes and manufacturing by 2023.

There are a few stages we intend to follow with our suppliers:

- Stage 1 - Change plastic cups used to biodegradable paper cups (2020)
- Stage 2 - Change any plastic straws used to biodegradable paper straws (2019)
- Stage 3 - Change plastic water bottles to reusable aluminium water flasks (2021)
- Stage 4 - Change any in-house manufacturing packaging and trays to biodegradable type (2022)

Other items to be considered:

- Any supplier packaging by 2020
- Bin bags by 2020
- Cleaning products including sprays, bleach, dishwasher tablets, washing up liquid, toilet roll and kitchen roll packaging by 2020
- Clean linen packaging by 2021
- Restaurant packaging by 2022
